Phase 1: Ideation Phase

1.2 Empathy Map Canvas

Date: 30 September 2026 | Team ID: _____ | Platform: ServiceNow

Empathy map for the primary user, the **Service Desk Agent**.

Says	Thinks
"This ticket has no asset details." "I have to call the user again."	Why can't the form force the right information? I lose time on every incomplete ticket.
Does	**Feels**
Reopens tickets, contacts callers for missing data, manually corrects fields.	Frustrated by rework, pressured by resolution targets, wants a cleaner form.

Pains	Gains
Missing mandatory data; wrong field values; repeated follow-ups; cluttered form.	Complete tickets on first submit; fewer follow-ups; faster resolution; a guided, simple form.
